FULL PAPERS

PAGE

Proteins

A novel manual method for protein-sequence analysis.
By J. Y. Chang & E. H. Creaser 77

Electrophoretic analysis of multiple forms of myosin in fast-twitch and slow-twitch muscles of the chick.
By J. F. Y. Hoh, P. A. McGrath & R. I. White 87

The purification and properties of ferritin from human serum.
By M. Worwood, S. Dawkins, M. Wagstaff & A. Jacobs 97

Amino acid-sequence variability at the *N*-terminal extra piece of mouse immunoglobulin light-chain precursors of the same and different subgroups.
By Y. Burstein & I. Schechter 145

Protein chromatography on adsorbents with hydrophobic and ionic groups. Chromatography of dodecyl sulphate-solubilized proteins of the human erythrocyte membrane on *N*-(3-carboxypropionyl)aminodecyl-Sepharose.
By R. J. Simmonds & R. J. Yon 153

Spectroscopic studies of the binding of bilirubin by ligandin and aminoazo-dye-binding protein A.
By E. Tipping, B. Ketterer, L. Christodoulides & G. Enderby 211

Kinetics of reaction of [nitrotyrosyl]cytochrome *c* with ligands.
By A. J. do Nascimento & K. H. do Nascimento 217

Demonstration of an androgen receptor in rat pancreas.
By Å. Pousette 229

Iron-dependent binding of 8-anilinonaphthalene-1-sulphonate by both lactoferrin and transferrin.
By N. Bilić, M. Casey & B. Blanc 233

Autoxidation of soluble trypsin-cleaved microsomal ferrocytochrome b_5 and formation of superoxide radicals.
By M. C. Berman, C. M. Adnams, K. M. Ivanetich & J. E. Kench 237

PAGE

Nucleic Acids

Replication of the deoxyribonucleic acid of multiple-drug-resistance factor in *Escherichia coli*.
By G. R. Barker, N. Hardman & T. M. Twose 221

Carbohydrates

Cartilage proteoglycans. Structure and heterogeneity of the protein core and the effects of specific protein modifications on the binding to hyaluronate.
By T. E. Hardingham, R. J. F. Ewins & H. Muir 127

Small Molecules

Isolation, determination of structure and synthesis of the acid-labile conjugate of aldosterone.
By P. C. Carpenter & V. R. Mattox 1

Enzymology

Kinetics and reaction mechanism of yeast alcohol dehydrogenase with long-chain primary alcohols.
By W. Schöpp & H. Aurich 15

Creatine kinase. Modification of the working enzyme.
By E. J. Milner-White & I. D. Kelly 23

Subcellular localization of ornithine decarboxylase in liver of control and growth-hormone-treated rats.
By B. J. Murphy & M. E. Brosnan 33

The elementary reactions of the pig heart pyruvate dehydrogenase complex. A study of the inhibition by phosphorylation.
By D. A. Walsh, R. H. Cooper, R. M. Denton, B. J. Bridges & P. J. Randle 41

Active-site determinations on forms of mammalian brain and eel acetylcholinesterase.
By M. A. Gordon, S.-L. Chan & A. J. Trevor 69

The role of tetrahydrofolate dehydrogenase in the hepatic supply of tetrahydrobiopterin in rats.
By K. J. Stone 105

PAGE

Studies on the cholesterol ester hydrolase of *Trogoderma* (Coleoptera).
By H. C. Agarwal & A. M. G. Nair 111

Adenosine 3′:5′-cyclic monophosphate-dependence of protein kinase isoenzymes from mouse liver.
By P. M. Ueland & S. O. Døskeland 117

Isolation and properties of a small manganese-ion-stimulated bacterial alkaline phosphatase.
By P. S. Fitt & P. I. Peterkin 161

Dipeptidyl peptidase IV, a kidney brush-border serine peptidase.
By A. J. Kenny, A. G. Booth, S. G. George, J. Ingram, D. Kershaw, E. J. Wood & A. R. Young 169

The nature of the residual α-mannosidase in plasma in bovine mannosidosis.
By B. G. Winchester, N. S. van-de-Water & R. D. Jolly 183

PAGE

The separation and characterization of the methylumbelliferyl β-galactosidases of human liver.
By P. S. J. Cheetham & N. E. Dance 189

A steady-state kinetic study of the reaction catalysed by the secondary-amine monooxygenase of *Pseudomonas aminovorans*.
By D. F. Brook & P. J. Large 197

The specificity of a 7α-hydroxy steroid dehydrogenase from *Escherichia coli*.
By E. S. Haslewood & G. A. D. Haslewood 207

The kinetics of formation of horseradish peroxidase Compound I by reaction with peroxobenzoic acids. pH and peroxo acid substituent effects.
By D. M. Davies, P. Jones & D. Mantle 247

An investigation of the nicotinamide–adenine dinucleotide-induced 'tightening' of the structure of glyceraldehyde 3-phosphate dehydrogenase.
By H. H. Osborne & M. R. Hollaway 255

RAPID PAPERS

PAGE

Proteins

Presence of type III collagen in guinea-pig dermal scar.
By M. J. Barnes, L. F. Morton, R. C. Bennett, A. J. Bailey & T. J. Sims 263

Types I and II collagens in intervertebral disc. Interchanging radial distributions in annulus fibrosus.
By D. R. Eyre & H. Muir 267

Nucleic Acids

Higher-plant mitochondrial ribosomes contain a 5S ribosomal ribonucleic acid component.
By C. J. Leaver & M. A. Harmey 275

PAGE

Lipids

Elongation of [ω-^{14}C]oleic acid and [ω-^{14}C]-nervonic acid.
By J. L. Rabinowitz, C. Lutton & F. Chevallier 271

Enzymology

An explanation of apparent sudden change in the activation energy of membrane enzymes.
By A. T. Wynn-Williams 279

Turkey liver xanthine dehydrogenase. Relation between nicotinamide–adenine dinucleotide oxidoreductase activity and the content of functional enzyme.
By Í. N. Fhaoláin & M. P. Coughlan 283

Kinetic analysis of experiments involving the single turnover of an enzyme.
By J. J. Holbrook, H. Gutfreund & J. Südi 287

GENERAL BOOKBINDING CO.
76 48388 2 013 1 C 2872
QUALITY CONTROL MARK

Contents of Volume 157, No. 2

FULL PAPERS

PAGE

Proteins

Isolation of albumin from whole human plasma and fractionation of albumin-depleted plasma.
By J. Travis, J. Bowen, D. Tewksbury, D. Johnson & R. Pannell 301

Studies on sequencing of peptides from the carboxyl terminus by using the thiocyanate method.
By M. Rangarajan & A. Darbre 307

The amino acid sequence of pike-whale (lesser-rorqual) pancreatic ribonuclease.
By M. Emmens, G. W. Welling & J. J. Beintema 317

The electrophoretic heterogeneity of bovine nasal cartilage proteoglycans.
By P. J. Roughley & R. M. Mason. 357

Biotin-binding protein from chicken egg yolk. Assay and relationship to egg-white avidin.
By H. B. White, III, B. A. Dennison, M. A. D. Fera, C. J. Whitney, J. C. McGuire, H. W. Meslar & P. H. Sammelwitz 395

The V-region sequence of the H chain from a third rabbit anti-pneumococcal antibody.
By J.-C. Jaton 449

The interactions of haem with ligandin and aminoazo-dye-binding protein A.
By E. Tipping, B. Ketterer, L. Christodoulides & G. Enderby 461

Oxidation–reduction potentials of molybdenum, flavin and iron–sulphur centres in milk xanthine oxidase.
By R. Cammack, M. J. Barber & R. C. Bray 469

Nucleic Acids

Contemporaneous isolation of deoxyribonucleic acid-dependent ribonucleic acid polymerase and poly(A) polymerase from rat liver mitochondria.
By R. Gallerani, C. De Giorgi, C. De Benedetto & C. Saccone 295

Lipids

Investigation of the abnormal low-density lipoproteins occurring in patients with obstructive jaundice.
By G. M. Kostner, P. Laggner, H. J. Prexl, A. Holasek, E. Ingolic & W. Geymayer 401

PAGE

Enzymology

Preparation of immobilized baker's-yeast glucose 6-phosphate dehydrogenase attached to modified Sepharose and Sephadex and a comparison of the properties of these preparations with those of the soluble enzyme.
By M. A. Goheer, B. J. Gould & D. V. Parke 289

Enzymes of 2-oxo acid degradation and biosynthesis in cell-free extracts of mixed rumen micro-organisms.
By R. S. Bush & F. D. Sauer 325

Deviation from Michaelis–Menten kinetics for fumarase.
By M. J. C. Crabbe & W. G. Bardsley 333

Isolation and characterization of human plasma α_1-proteinase inhibitor and a conformational study of its interaction with proteinases.
By J. Saklatvala, G. C. Wood & D. D. White 339

Comparative activity of arylsulphatases A and B on two synthetic substrates.
By E. E. Delvin, A. Pottier & F. H. Glorieux 353

The identification and properties of phosphatases in skeletal muscle with activity towards the inhibitory subunit of troponin, and their relationship to other phosphoprotein phosphatases.
By K. P. Ray & P. J. England 369

The β-glucosidase in the gut contents of the snail *Achatina achatina*. Energy-dependent modification of structure and activity.
By G. M. Umezurike 381

Kinetic mechanism from steady-state kinetics of the reaction catalysed by baker's-yeast glucose 6-phosphate dehydrogenase in solution and covalently attached to Sepharose.
By B. J. Gould & M. A. Goheer 389

Purification and properties of pantothenase from *Pseudomonas fluorescens*.
By R. K. Airas, E. A. Hietanen & V. T. Nurmikko 409

PAGE

Kinetic studies on pantothenase from *Pseudomonas fluorescens*. Effect of pH on substrate and inhibitor binding.
By R. K. Airas 415

A purification procedure for the soluble cytochrome oxidase and some other respiratory proteins from *Pseudomonas aeruginosa*.
By S. R. Parr, D. Barber, C. Greenwood, B. W. Phillips & J. Melling 423

Some spectral and steady-state kinetic properties of *Pseudomonas* cytochrome oxidase.
By D. Barber, S. R. Parr & C. Greenwood 431

PAGE

Nitrogenases from *Klebsiella pneumoniae* and *Clostridium pasteurianum*. Kinetic investigations of cross-reactions as a probe of the enzyme mechanism.
By B. E. Smith, R. N. F. Thorneley, R. R. Eady & L. E. Mortenson 439

Subcellular localization of a rat liver enzyme converting thyroxine into tri-iodothyronine and possible involvement of essential thiol groups.
By T. J. Visser, I. van der Does-Tobé, R. Docter & G. Hennemann 479

RAPID PAPERS

PAGE

Proteins

Interaction of pepstatin with pig pepsinogen.
By J. Kay & C. W. Dykes 499

Instability of rat liver chromatin and other nuclear non-histone proteins in alkaline solution.
By M. Gronow, T. M. Thackrah & F. A. Lewis 507

Isolation of (copper, zinc)-thioneins from the livers of copper-injected rats.
By I. Bremner & B. W. Young 517

Radioimmunological identification of tropoelastin.
By P. Christner, M. Dixon, A. Cywinski & J. Rosenbloom 525

Carbohydrates

The formation of a stable complex between dissociated proteoglycan and hyaluronic acid in the absence of a link protein.
By D. A. Swann, S. Powell, J. Broadhurst, E. Sordillo & S. Sotman 503

PAGE

Small Molecules

The identification of 2,8-dihydroxyadenine, a new component of urinary stones.
By H. A. Simmonds, K. J. Van Acker, J. S. Cameron & W. Snedden 485

The ^{3}H-labelling of bilirubin.
By F. E. Hancock, D. W. Hutchinson & A. J. Knell 511

Enzymology

Methods for fitting equations with two or more non-linear parameters.
By I. A. Nimmo & G. L. Atkins 489

Two methods for fitting a rectangular hyperbola to data from several animals.
By I. A. Nimmo 493

Some properties of a soluble methane monooxygenase from *Methylococcus capsulatus* strain Bath.
By J. Colby & H. Dalton 495

Mitochondrial glycerol kinase activity in rat brain.
By J. T. Tildon, J. H. Stevenson, Jr. & P. T. Ozand 513

Absence of binding of pancreatic and urinary kallikreins to α_2-macroglobulin.
By E. Vahtera & U. Hamberg 521

Contents of Volume 157, No. 3

FULL PAPERS

PAGE

Proteins

Characterization of upFc, a fragment of human immunoglobulin G1 produced by pepsin in urea.
By D. M. Parr, T. Hofmann & G. E. Connell 535

The unactivated form of the first component of human complement, C1.
By I. Gigli, R. R. Porter & R. B. Sim 541

Interaction of cell-membrane prolactin receptor with its antibody.
By R. P. C. Shiu & H. G. Friesen 619

Phosphorylation of synaptic-membrane proteins from ox cerebral cortex *in vitro*. Partition of substrates and protein kinase activities with Triton X-100.
By P. R. Dunkley, H. Holmes & R. Rodnight 661

Rabbit muscle myogen. Interactions with phosphate as the source of non-enantiography in moving-boundary electrophoresis.
By S. J. Lovell & D. J. Winzor 699

Nucleic Acids

Human leukaemic cells. Determination of trace elements in nucleic acids and histones by neutron-activation analysis.
By E. L. Andronikashvili, L. M. Mosulishvili, A. I. Belokobil'skiy, N. E. Kharabadze, N. I. Shonia, L. S. Desai & G. E. Foley 529

Methylated purines in the deoxyribonucleic acid of various Syrian-golden-hamster tissues after administration of a hepatocarcinogenic dose of dimethylnitrosamine.
By G. P. Margison, J. M. Margison & R. Montesano 627

The binding of echinomycin to deoxyribonucleic acid.
By L. P. G. Wakelin & M. J. Waring 721

Lipids

The occurrence of *cis*-octadec-15-enoic acid as a major biohydrogenation product from methyl linolenate in bovine rumen liquor.
By D. R. Body 741

PAGE

Carbohydrates

The chemical constitution of the proteoglycan of human intervertebral disc.
By R. H. Pearce & B. J. Grimmer 753

Small Molecules

Synthesis of δ-(α-aminoadipyl)cysteinylvaline and its role in penicillin biosynthesis.
By P. A. Fawcett, J. J. Usher, J. A. Huddleston, R. C. Bleaney, J. J. Nisbet & E. P. Abraham 651

Enzymology

Mammalian tyrosinase. A comparison of tyrosine hydroxylation and melanin formation.
By V. J. Hearing & T. M. Ekel 549

Large-scale purification and characterization of dihydrofolate reductase from a methotrexate-resistant strain of *Lactobacillus casei*.
By J. G. Dann, G. Ostler, R. A. Bjur, R. W. King, P. Scudder, P. C. Turner, G. C. K. Roberts, A. S. V. Burgen & N. G. L. Harding 559

An apparent lack of stereospecificity in the reaction catalysed by deoxyribose 5-phosphate aldolase due to methyl-group rotation and enolization before product release.
By D. L. Corina & D. C. Wilton 573

The kinetics of rabbit muscle pyruvate kinase. Initial-velocity, substrate- and product-inhibition and isotopic-exchange studies of the reverse reaction.
By I. G. Giles, P. C. Poat & K. A. Munday 577

Studies on partially reduced mammalian cytochrome oxidase reactions with ferrocytochrome *c*.
By C. Greenwood, T. Brittain, M. Wilson & M. Brunori 591

Modification of diamine oxidase activity *in vitro* by metabolites of asparagine and differences in asparagine decarboxylation in normal and virus-transformed baby-hamster kidney cells.
By G. Quash, H. Calogero, N. Fossar, A. Ferdinand & D. Taylor 599

Determination of the mechanism and kinetic constants for hog kidney γ-glutamyltransferase.
By J. W. London, L. M. Shaw, D. Fetterolf & D. Garfinkel 609

PAGE

Organ distribution of rat histidine–pyruvate aminotransferase isoenzymes.
By T. Noguchi, Y. Minatogawa, E. Okuno & R. Kido 635

Isolation of membrane-bound renal enzymes that metabolize kinins and angiotensins.
By P. E. Ward, E. G. Erdös, C. D. Gedney, R. M. Dowben & R. C. Reynolds 643

The properties of uridine diphosphate glucuronyltransferase(s) which catalyse the synthesis of steroid glucuronides in microsomal fractions from guinea-pig liver.
By D. Zakim & D. A. Vessey 667

The asymmetric distribution of enzymic activity between the six subunits of bovine liver glutamate dehydrogenase. Use of D- and L-glutamyl α-chloromethyl ketones (4-amino-6-chloro-5-oxohexanoic acid).
By C. G. Rasool, S. Nicolaidis & M. Akhtar 675

PAGE

Myosin light-chain phosphatase.
By M. Morgan, S. V. Perry & J. Ottaway 687

Guanylate cyclase. Subcellular distribution in cardiac muscle, skeletal muscle, cerebral cortex and liver.
By P. V. Sulakhe, S. J. Sulakhe, N. L.-K. Leung, P. J. St. Louis & R. A. Hickie 705

Properties of particulate, membrane-associated and soluble guanylate cyclase from cardiac muscle, skeletal muscle, cerebral cortex and liver.
By S. J. Sulakhe, N. L.-K. Leung & P. V. Sulakhe 713

A trypsin and chymotrypsin inhibitor from chick peas (*Cicer arietinum*).
By P. Smirnoff, S. Khalef, Y. Birk & S. W. Applebaum 745

RAPID PAPERS

PAGE

Proteins

The subunit structure of thyroglobulin.
By R. Pitt-Rivers 767

A new type of representation of dipeptide conformation.
By R. Balasubramanian 769

Iso-cytochrome *c* species from baker's yeast.
By Y. Looze, E. Polastro, C. Gielens & J. Léonis 773

PAGE

The separation and sequencing of permethylated peptides by mass spectrometry directly coupled to gas–liquid chromatography.
By J. D. Priddle, K. Rose & R. E. Offord 777

Changes in conformation of reduced cytochrome *c* in neutral aqueous solution.
By E. J. Land & A. J. Swallow 781

Enzymology

Activation by cholera toxin of adenylate cyclase solubilized from rat liver.
By S. Van Heyningen 785
